

SAFETY NOTICE

Loading and Unloading of Trucks

Examples of guidelines and safety tips for the loading/unloading of vehicles and Forklift Operations.

- The driver of the truck must physically sight, that the loading /unloading of the vehicle has been completed and that all forklift operators involved in the loading /unloading of that vehicle have been made aware that the truck is about to leave.
- Curtains and doors of the vehicle must be closed/secured after the truck has been loaded/unloaded.
- All loads must be secured on table top trucks before the vehicle is driven (e.g. secured by restraints)
- Do not over load the vehicle.
- The vehicle you are using must be in good condition. **Daily checks** on vehicles should be carried out by the operator.
- Truck drivers must have a clear view when reversing, **if not**, have a person assist by directing the driver.
- Roads & Maritime Services (RMS) Road Rules apply to all vehicles operating on the Market Site.
- It is good practice for businesses in the Market to conduct weekly Tool Box meetings with staff on WHS practices.

NOTE: All unsafe work practices need to be reported to an SML Market Officer or by calling the 24 hour SML contact number 0409 325 232 or the WHS Manager on 0417 325 171.

Safety is Everyone's Responsibility
